

Basket Handling Equipment

DESIGN AND MANUFACTURE OF SPECIAL PURPOSE EQUIPMENT

Autarky Automation Limited have been designing and manufacturing special purpose equipment and conveyors for over 38 years.

We supply a range of equipment from simple pumps to complete turnkey projects automating the product collation and basket loading of large plant bakeries.

Over the years considerable knowledge has been gained allowing

Autarky to provide bespoke solutions to a wide variety of customers.

With our in house CAD design team, Computer aided machining centres, skilled electrical & mechanical staff together with our own software engineers we can provide our

customers with the solutions they require.

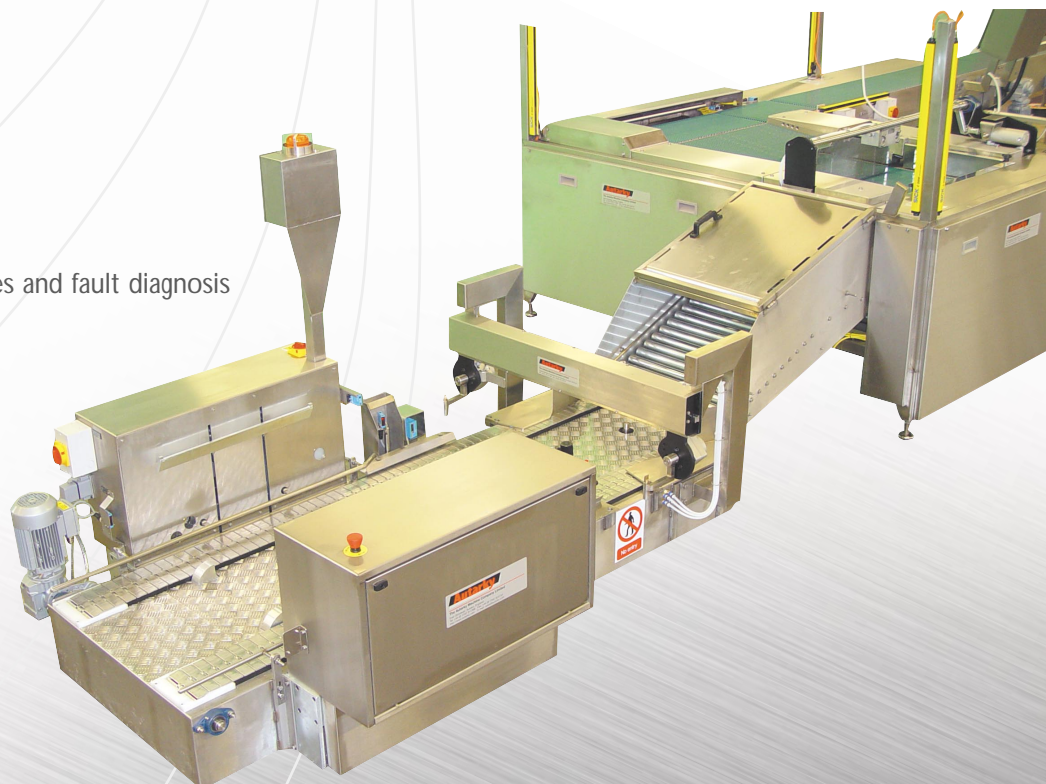

The company is located close to Gatwick, one of the UK's largest Airports providing easy access to all major cities in the world.

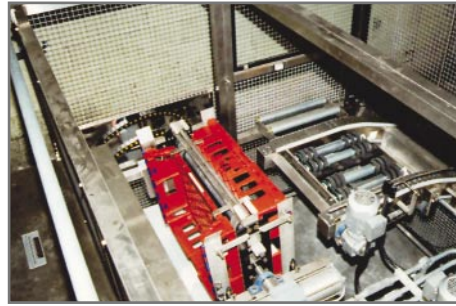

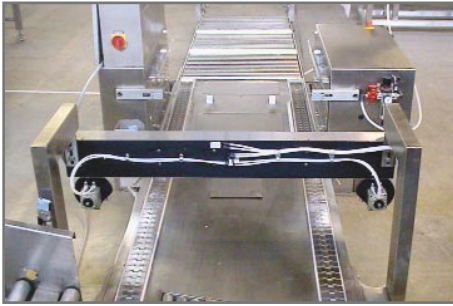

Basket Loader

The Basket Loader has been developed over a period of 25 years. In all Autarky have produced in excess of 150 Loaders of various specifications to suit individual Bakery requirements

Specifications:

- Speeds up to 80 loaves
- Pattern Making Facilities
- PLC Controlled
- Operator Interface for product changes and fault diagnosis
- Stainless Steel Construction

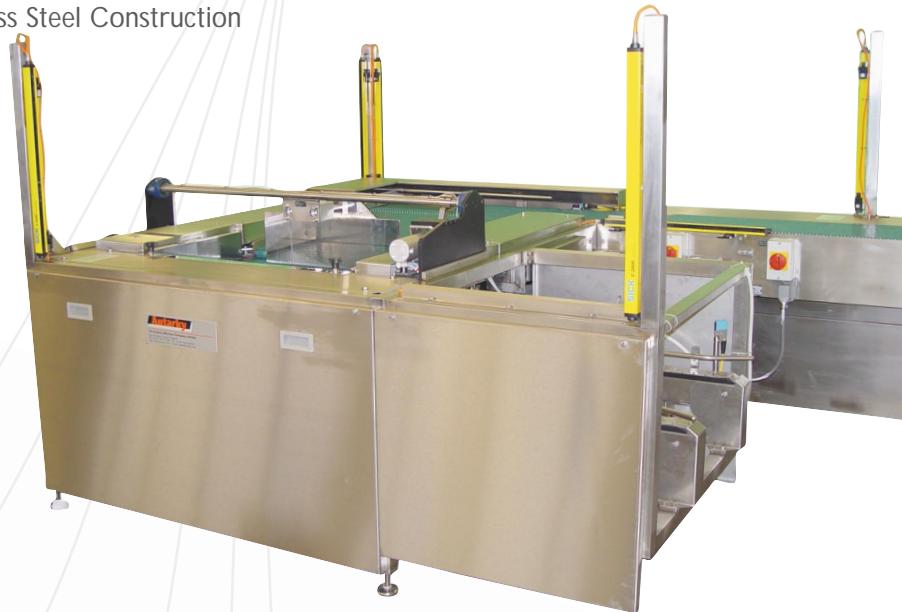

Basket Stacker

Although this machine is very compact the base fabrication is 12mm thick steel plate with two main lifting bearings each able to withstand 1000kg. This robust technique of construction has been used to produce over 150 stackers and provides an extremely reliable machine.

Specifications:

- Speeds up to 25 Trays per minute
- PLC Controlled
- Bale Arm detection
- Stainless Steel Construction

Stacking Arm Positioner

This unit is usually situated on infeed to the Stacking machine and controlled from the local PLC. Various types are available including vacuum picking units.

Specifications:

- PLC Controlled from local Stacker
- Stainless Steel & Aluminum Construction

Basket Denesters

Over the past 20 years Autarky have developed a range of Basket Denesters. Bottom and top exit types are available with debris removal.

Specifications:

- Speeds up to 30 Trays per minute
- Stainless Steel Construction
- PLC Controlled
- Debris removal system
